

Websites content

A repository of the abstracts of former conferences

Recordings of performances during conferences – TED / CARL

Questionnaires to find one's own blind spots: nPep

Lessons, on attitude, technique etc

An encyclopedia on general/family practice

(a) In general:

Regularly updated list of Council members

'Facebook' page for EURACT

Version of web site in other languages (or at least some pages or documents)

Newsletter posted on-line (present and past issues)

(b) For members:

Members' section

Register of members' individual interests

E-mail service

Facility to upload/download teaching resources, documents and links

Discussion boards for EURACT members

List of all EURACT members

(c) For non-members:

A "news window": what's new in GP in Europe

Membership Application

Special section for trainees

Discussion boards / chat section: where visitors can register and chat/discuss/ask questions, could be in different languages

Updated schedule of registration fees

An encyclopedia (by a commercial publisher) on everything but general/family practice

Link to Linked-in group to benefit from synergy

Yellow pages information on the organisation and all its constituents – who's who

Startup period

Content will be uploaded or "crawled" from various sources, being: centrally, the secretariat of WONCA Europe, peripherally: from the Colleges/Societies. That means that there will be no head webmaster, but a college of webmasters, with the WONCA Europe webmaster as Chairman.

Every SIG, Working Party or College/Society will have full autonomy as to what is put on the web site.

Virtually, nothing much changes, except the hosting, and in the beginning, a change of bookmarks.

So after an initial phase, no great change.

In the future, a lot of possibilities can be added – videos, CPD, encyclopedia's, journals.

ICPC, a clinical decision support system.

To gather video's of interesting talks, conferences, symposia (TED)

Abstract repository

Development of CPD

Forum, blog, who is who, reaching other researchers

VoIP teleconferencing

What can be offered that is not yet provided for by the Colleges?

International blog, forum,

A yearly (5-yearly) working theme: e.g. the revision of the "definition of GP/FM"

Facilitate exchange for medical students / trainees / residents

Autonomy of the part of the web site designed for a group (e.g. EGPRN)

Automatic translation
