

## **WONCA Statement on health professionals working in areas of conflict**

17 June 2024

In the face of escalating tensions and violence around the world, WONCA seeks the global cessation of all violence as a solution to conflict, and condemns both terrorism and oppression of vulnerable peoples everywhere. WONCA supports all health professionals working in areas of conflict, and continues to call for particular attention to the protection of all patients and frontline health workers and any health care facility where persons go to seek aid for illness and injury.
